## Preface

Our book is based on a Chessable course we made on the Hedgehog System which was published in August 2022. Accordingly, this is a joint venture between Chessable and New in Chess. This was our very first Chessable work, we were enthusiastic about it and motivated to make something nice. So, we were extremely happy when one of our readers wrote to us, calling it 'a hidden gem of a course'.

The system presented here has been Hanna's main weapon in the Sicilian for several years. She has gained a lot of practical experience in it. The Hedgehog System became popular in the 1970s and Laszlo witnessed the rapid development of this set-up, so he has been teaching this system for more than 40 years.

Our book targets devotees of the English and (or) Sicilian Kan (or Taimanov). The title, Beating the Hedgehog System, indicates that this is a White repertoire, providing a straightforward path without alternatives for the first player. In the Hedgehog, the middlegame is an integral part of the opening, and our work is for at least $50 \%$ a middlegame study. The system is very complex: on the one hand, the play is usually positional, based on prophylactic thinking. On the other hand, if Black can achieve a breakthrough (...d6-d5), then suddenly wild tactical complications arise. However, understanding and learning this set-up is much easier than the sharp Sicilian variations (Najdorf, Dragon) where the lines are often long and forced, and analysis with engines is unavoidable. In the Hedgehog, in general, an inaccurate move does not lead to a quick catastrophe.

Studying the book, the reader can learn how important the small details are in this system. One of the Chessable users summarized it as follows: 'I am way more aware of how to develop my heavy pieces in the late opening phase of any closed/semi-closed position I might get.'

We hope our book will be very useful not only for club players but for professional players as well.

Laszlo Hazai, Hanna Ivan-Gal, Budapest, January 2023

## Introduction

## $1 . c 4$

This is the starting point of the English Opening. White starts his fight for the centre, not allowing the immediate $1 . . . \mathrm{d} 5$. He prepares, according to the Philidor rule, $2 . \mathrm{E}_{\mathrm{C}} \mathrm{c} 3$.
1...c5

Black is playing for symmetry by fighting against 2.d4.

## 2. 0 f3

Nevertheless, White still prepares for 3.d4 to take back with the knight on d4.

## 2... 0 f6

Following the symmetry, Black develops the kingside knight and waits with the other knight. As we will see later, the flexibility of the queenside is of high importance.

## 3.d4

White takes over the centre.

## 3...cxd4 4. $0 x d 4$ b6

Black fianchettoes the bishop to fight against e2-e4.

## 5. 0 c3

This is the natural place of the knight in the English Opening. White prepares 6.e4.

## 5...思b7

By developing the bishop on the long diagonal, Black now controls the vital e4-square.

## 6.f3

White takes up the gauntlet; he wants to play 7.e4 by all means.
6...e6

Black opens the diagonal for his dark－squared bishop．

## 7．e4 d6

This is the typical Hedgehog pawn structure with the strong white central pawns on c4 and e4 versus Black＇s e6－and d6－pawns．In addition，in most cases Black will play ．．．a7－a6 as well，creating the tabiya position of the real Hedgehog．

## 8．鼻e2

The white bishop belongs to e2；on d 3 ，it would weaken the pressure along the d－file．

## 8．．．寊e7

Black＇s plan is to develop the bishop on e7，followed by ．．．0－0．

## 9．0－0 0－0

This is a quiet，positional system without any sharp kingside attacks，at least not in the early phase of the opening．
10．息e3

This is the starting point of our analysis．The best place for the dark－ squared bishop is on e3，controlling the two important g1－a7 and c1－h6 diagonals．
10．．．a6
This is the typical Hedgehog pawn structure．White has a strong pawn centre with the c4－and e4－pawns，and the black pawns are in＇defensive
mode＇on a6，b6，d6 and e6．It looks rather passive at first sight，since only one knight is on the 6th rank，and the other black pieces have to be satisfied with the 7th and 8th ranks．However，the situation is much more complex than that．In the old dogmatic world，even the best players overestimated the importance of the space advantage．Only in the 1970s did young players such as Ljubojevic，Andersson，Psakhis，Ftacnik，Adorjan start to play this system with good results，finding new modern ideas of obtaining counterplay．Later，almost all the best players adopted it，like Kasparov，Karpov，Hübner，Portisch，Ribli and many others．Nowadays， many leading players use it with White or Black．

Knowledge of the Hedgehog is very important not only for fans of the English Opening，but also for those who play the Sicilian with White or Black．It may arise from the Sicilian Kan（Neo－Paulsen）via 1．e4 c5 $2 . \varrho \mathrm{Cf} 3$

鼻e7 7．c4 d6 reaches the Hedgehog position．Another main line is $5 . . . \circlearrowright f 6$
 Sicilian Taimanov（Paulsen）Variation after 1．e4 c5 2．⿹f3 e6 3．d4 cxd4 4． 0 xd 4 © $\mathrm{c} 65.0 \mathrm{D} 5 \mathrm{~d} 66 . \mathrm{c} 4$ ，followed by ．．．a7－a6．

You may think that if Black plays $2 \ldots . . \mathrm{d} 6$ ，aiming for the sharp Najdorf， Dragon，Sicilian Four Knights，or the Scheveningen，then he can avoid this structure．Not necessarily，because after 3．d4 cxd4 4．⿹xd4 $勹 \mathrm{ff} 5 . \mathrm{ff}$ e6 6．c4， we have again the same structure．Even after the Moscow Variation 3．© $\mathrm{e} 5+$
 another main line in the English where we can reach the Hedgehog，but
息 e 7 7．d4 cxd4 8 ．響xd4 d6．

So there are a lot of openings where knowledge of the Hedgehog is very important．It may even arise from the Queen＇s Indian and the King＇s Indian！Nevertheless，understanding the Hedgehog helps a player to improve his overall play，by learning about the manoeuvring battle，precise move orders，attack and counterattack，central breakthrough，wild tactical complications，and how to hold the position without ruining it．In this book，there are chapters on typical games and typical ideas that explain the complex character of this wonderful middlegame．

## CHAPTER 1

## The early 10．．．${ }^{2}$ bd7

自e7 9．0－0 0－0 10．畧e3

10．．． 0 bd7
$10 \ldots \mathrm{a}$ is more flexible，ruling out the a2－a4 plans and leading to the main line．

The knight is less flexible on c6 than on d 7 ．On c6 it can be a target after
 c－file．If 10 ．．．$\circlearrowright \mathrm{c} 6,11$ ．${ }_{\mathrm{c}}^{\mathrm{m}} \mathrm{d} 2$ and now：
A） $11 \ldots$ a6 transposes to $10 \ldots$ ．．．a6；
B） $11 . . .2 \mathrm{e} 5$ ．The target is the c4－pawn． 12 ． efd （the usual set－up for the
 queen is fine here，but first Black has to develop his a8－rook to c8．Now the rook on a8 looks imprisoned：13．．．．ac1さ．The queen on b8 disturbs the cooperation between the black rooks，and the rook on a8 cannot be mobilized）13． $\mathrm{C}^{\mathrm{db}} 5$（one of the pawns will fall，but Black gets the c4－pawn）
 and f3－pawns make the black minor pieces lame ducks．The diagonal of the b7－bishop is closed，and the f6－knight also bites on the wall of these pawns；
C） $11 . . . \triangle \mathrm{xd} 412 . \mathrm{Q}^{\mathbf{1}} \mathrm{xd} 4 \pm$ ．The centralized bishop dominates the board．In case of the typical ．．．d6－d5 push，White can close the centre by e4－e5；
 typical Hedgehog pawn structure）13．Eac1（this is the ideal set－up for the white rooks）13．．． $2 \mathrm{e} 5-10 \ldots \mathrm{a}$ ．

## 11．a4

White starts his offensive on the queenside．The plan is a4－a5， creating weaknesses in the black pawn structure．This can only be effective in case of 10 ．．． bd7； otherwise ．．．$₫ \mathrm{c} 6$ will fight for the vital b4－and a5－squares．
11．碩d2 矼b8（11．．．a6－10．．．a6；weaker is $11 . .$. e 5 transposing to the 10．．． Qc $^{2} 6$ line． 11 ．．．em 8 is already a mistake：12．${ }^{2}$ db5！punishes Black immediately，creating a double attack against the a7－and d6－pawns． $12 . . .2 \mathrm{e} 513$. eld $1-10 \ldots . .2 \mathrm{c} 6$ ．The a8－rook belongs on c8，and after that comes the typical queen manoeuvre ．．．撉d8－c7－b8）．12．皆fd1 （the d6－pawn cannot be protected by a pawn，so it can be a long－ lasting target） 12 ．．．蔦d8

13．铛e1（leaving the d－file in case of a ．．．d6－d5 push）13．．．$\searrow \mathrm{ff} 8$（the knight is heading for g6，where it can control some dark squares） 14 ．${ }_{\text {ung }}$ g （White wants to put more pressure on the d6－pawn）14．．． 0 g6 15．．eac1 （White finishes his development， putting his last piece on the right square）15．．．．${ }^{\text {ed }} \mathrm{d} 7$（the rook is usually
passive on d7；the knight belongs there）16． $\mathbf{~} \mathrm{f} 1$（this is a well－known prophylactic move．The bishop on f 1 is not vulnerable anymore） 16．．．寢d8（Black hardly improves his position with these back－and－forth moves）17．富h $1 \pm$ ．This is the other prophylactic move to bring the king to a safer place，Zhuravliov－ Magerramov，St Petersburg 1992.

## 11．．． 16

A） $11 . .$. 䔿 8 forgets about the weakness of the a7－pawn：12． ®db $^{2} \pm$ ， with a double attack，winning a pawn．The Hedgehog set－up is not complete without ．．．a7－a6．

 17．崽xf1 $\pm$ ．White has good chances to create a remote passed pawn on the queenside；
B） $11 . . .(\mathrm{c} 5$ runs into b2－b4， winning two extra tempi for White： 12．b4！©cd7 13．a5！bxa5 14．\＃xa5 （White has to take back on a5 with a piece，keeping the flexibility of the b4－and c4－pawns）14．．．d5 （this is the typical counterblow in the centre，as the b4－pawn is vulnerable） $15 . c 5 \pm$ ．The protected passed pawn on c5 is very strong， and the threat is c5－c6，with a fork；
C）11．．．a5．Black closes the queenside and his knight on c5 can be a strong blockading piece．On the other hand，this move irreversibly weakens the b5－square：12． $\mathrm{C}^{\mathrm{d}} \mathrm{db5}$（White now has a wonderful knight on b5 that

d6－pawn is in a big trouble，as the b 5 －knight is too dangerous） 13．b3（White wants to bring his rook to the d－file via the second rank）13．．．．${ }^{\text {ed }} \mathrm{d} 8$（overprotecting the d6－pawn）14．${ }^{\text {ead } 214 . . . \circlearrowright c 5 ~(t h e ~ b l a c k ~}$ knight has arrived at the ideal blockading square） 15 ．曾d $2 \pm$ ．White＇s next plan is 梫c2／酸fd1／䚁f4 to put a lot of pressure on the d6－target； D）11．．．乞e5．Black runs into the foray f3－f4．The set－up with $10 . \mathrm{f} 3$ is rather positional and White＇s chances lay on the queenside． However，in some cases he can change the course of the game with the f3－f4 advance on the kingside： $12 . \mathrm{f4}$ ©c6（12．．．${ }^{\text {Ded }} 7$ 13．鼻f3（the bishop on f3 takes an
压ac8 15．f5（if Black cannot protect the e6－pawn with a piece，his pawn structure becomes weak and vulnerable）15．．．e5 16． ®d5 $^{\text {恖xd5 }}$ 17．cxd5＋－．The white knight jumps to c6 and Black has no chance to come out of passivity）13． 0 xc6 鼻xc6 14．㟶c $2 \pm$ ．White has opened a wide front，so he already has chances in the centre and on the kingside；
E）11．．．อe8 prepares the central push ．．．d6－d5，opening the e－file for the rook．12．a5 bxa5 13． 0 b3 a4 （fighting against 0 xa5） $14 . \wedge^{\circ} \mathrm{xa} 4 \mathrm{~d} 5$ （the typical central breakthrough has arisen）15．exd5 exd5 16．c5 $\pm$ ． If White can blockade the crucial d4－square，the b7－bishop and the f6－knight remain passive；
F）The immediate freeing move $11 . . \mathrm{d} 5$ is less effective，if White has
a strong knight jump to f5：12．exd5 exd5 13.0 f 5 ！（as a rule，the knight is wonderful on f5！）13．．．dxc4 14．鼻xc4 E5（Black is attacking the bishop by centralizing his knight）15．© ${ }^{\text {O }} \mathrm{b} 5$ （White had to make a decision： which diagonal to give up？From b5， the bishop controls the d3－square and the a4－e8 diagonal）

analysis diagram
15．．．气g6（15．．．寊c5 doesn＇t allow White to grab the bishop pair， but at the same time ruins the pawn structure on the queenside：
 a better pawn structure on the queenside because of the weak a7－ and c5－pawns．The white pieces are more active；the e5－knight has to leave the centre）16．㟲xd8（White wants to liquidate to an endgame， where he obtains the bishop pair） 16．．．日fxd8（16．．．鼻xd8（Black wants to keep his bishop alive）17．eqd1 $\pm$ ． The white pieces dominate the board）17． 0 xe7＋（exchanging the dark－squared bishop for the knight is a big achievement for White．The b7－bishop remains fairly passive， as it has no good squares on the

（White has the bishop pair in an open position with the pawns 3 vs 3 on the kingside and 2 vs 2 on the queenside．Without central pawns，the bishops can find a lot of open diagonals）18．．．$巳 \mathrm{fd} 5$ 19．$\triangleq \mathrm{xd} 5$ exd5 20．achat ．White has a small， but long－lasting advantage in the endgame．
12．a5！

White destroys the flexible Hedgehog structure，and the a6－pawn becomes a weakness on the semi－open a－file．

## 12．．．bxa5

A） $12 . . . \mathrm{d} 5$ is again strongly met by the previous motif of 2 f 5 ！ 13．cxd5 exd5 14．$₫ f 5$ ！dxe4（14．．．bxa5 $15 . e x d 5 \pm$ ．White has a virtual pawn majority，and his d5－passed pawn is very strong）15．axb6（it is far from easy to eliminate this dangerous passed pawn）15．．．鼻c5 16．鼻xc5
 more active and the remote passed pawn on b6 gives White good prospects in the endgame；
B） 12 ．．． E e8．There is a big fight on the queenside，and Black has no time for preparatory moves to create a counterattack in the
centre：13．axb6 $0 x$ xb6 14． 2 b 3 （the knight will be ideally posted on
 wants to save his bishop，but by leaving the long diagonal it gets into a miserable position）16．b4 （now the knight on b6 is vulnerable and it doesn＇t do anything useful） 16．．．$\triangle$ bd7（Adla－Cordova，Spain tt
 breakthrough on the queenside by b4－b5 or c4－c5；
 knight is not well－placed here and can easily be attacked） 14 ． $\begin{aligned} & \text { wibl b } \\ & \text { b }\end{aligned}$
C1） $14 . . . \varrho \mathrm{bd} 715 .{ }^{\text {enf }} \mathrm{fc} 1$

analysis diagram
C11）15．．． $\begin{gathered}\text { g．h } \\ \text { ．} \\ 8\end{gathered}$ Black wants to follow the famous Fischer plan with ．．． g 88 and ．．．g7－g5．16．嶿a2（clearing the way for b2－b4）16．．．亯g $817 . \mathrm{b} 4 \mathrm{~g} 5$ （after 17．．． C b8 18.0 a4，White has a big advantage on the queenside） 18．山⿰幺幺斤丶万女子（the queen can be very effective on the long diagonal）18．．． g4 19．f4 $\pm$ ，and Black failed to open the $g$－file，so his strategy proved to be pointless；
C12）After 15．．． queen to d1 is a good strategy，as it is rather vulnerable on b3：16．崖d1 $1 \pm$ ；
 can easily protect his c4－pawn by $\mathrm{b} 2-\mathrm{b} 3$ ，but in the long run he has to prepare b2－b4，and after that，b4－b5 or c4－c5．

C2）14．．．$\searrow \mathrm{Df} 7$ 15．${ }^{\text {elfc1 }}$（the white rooks belong on the queenside） 15．．．． better pawn structure，and the b6－knight cannot find its best place． 13．0b3

The knight can be very useful on a5，attacking the b7－bishop and blockading the weak a6－pawn．

## 13．．．． $\mathbf{y b} 8$

Preparing the retreat of the bishop to a8．Controlling the semi－open b－file is of high importance since White＇s major plan is b2－b4．
A）After 13．．．铛c7，the b7－bishop gets into trouble：14． $\mathrm{V}_{\mathrm{xa}}$－ Efb 8 （Black can save the bishop by 14．．．（1）c8，but he has to pay a heavy price．It is very passive on c8， disturbing the connection between the rooks． 15 ．${ }_{\text {wid }} \mathrm{d} 2$（meanwhile the white rooks are now connected）
 into the following tactical blow： 17．b4！©b7（Likavsky－Dudukovic，
 winning the exchange）18． C d5！（a beautiful positional piece sacrifice！） 18．．．exd5 19．cxd5 婦d7 20.0 c6 皆a8 21．皆xa6 当xa6 22．賭xa6＋－．White has only two pawns for the piece， but the black army is completely disorganized！）15．嵦d2

analysis diagram
15．．．鼻 c 8 （saving the bishop＇s life， but putting it in prison；15．．．鼻c6 （opening the b－file for the rook， but the bishop becomes exposed） 16．甞fc1 0 c 5 （ $16 .$. 鼻f8？is usually just a waste of time：17． $\mathbf{Q}$ d5！．This typical tactical blow，using the pin on the c－file，was overlooked by many strong players．17．．．钲c8（17．．．exd5 18．cxd5＋－）18．b4＠${ }^{\text {Q }}$ b7（Schlosser－ Lappalainen，Stockholm 2003／04） 19． nxf $^{\text {x }}$－xf6 20．c5＋－．White now creates a powerful passed pawn
 White is winning the exchange）
 （by this small combination，White wins the exchange；the b4－rook is now trapped） $18 \ldots$ ．．．axb5 19 ．嵝xb4 （Black can only get one pawn for the exchange）19．．．bxc4 20． Vxc4＋－$^{\text {x }}$ Jo．Horvath－Schäfer，Böblingen 2001；

B）13．．．a4，fighting against $\mathrm{cta}_{\mathrm{x}} 5$ ． 14． 0 xa 4 h 5 ．This is the so－called Ljubojevic plan．Black wants to sacrifice his h－pawn via ．．．h5－h4－h3． This would weaken the white king＇s defence，and later ．．．d6－d5 may be played to activate the black pieces and open the long diagonal for the light－squared bishop．15． 1 畧 $\mathrm{f} 2 \pm$ ， defending against the advance ．．．h5－ h4．

## 14． Vxa5 $^{2}$

14．鼻a7．

analysis diagram
This subtle intermediate move deserves serious attention．The rook has to leave the important b－file， and the bishop can retreat to d4 or f 2 ，improving the situation a bit．
 would be a repetition of moves． White can start a psychological war． This may work very well against a much higher rated opponent，but if Black wants to win，he has to take a bigger risk）15．．．a4（15．．．亯b8 16．©xa5鼻a8－14．．．当c8）16．⿹xa4 嵝c7

 （Black wants to prepare the ．．．d6－d5 push）18．${ }^{\text {Eff1 }} \pm$ ，and White will not
 advance on the queenside by 4 ／ b2－b4．

## 14．．．鼻a8 15．菐d2

Protecting the b2－pawn and indirectly preparing the b2－b4 push．

## 15．．．h5

A） 15 ．．．d5？is now premature：
16．cxd5 exd5 17．exd5 鼻c5 18．鼻xc5
©xc5 19．${ }^{\text {efd }} \mathrm{fd}$ ！$\pm$ ，overprotecting the extra pawn on d 5 ；
B） $15 . . . \circlearrowright$ c 5 ？！runs into White＇s main threat of b2－b4：16． （the big threat is now b2－b4，and the knight has to go backwards） 16．．．巴 $\mathrm{E} 417 . \mathrm{b} 3!\pm$ ，and the b4－rook will be captured or chased away；

analysis diagram
This is a very important prophylactic move that avoids
the possible threats on the g1－a7 diagonal．
C1）16．．．${ }^{\text {夏 }} \mathrm{f} 8$ ．Now the bishop is not disturbing the rook on the e－file anymore，and the threat of ．．．d6－ d5 becomes more real．However， White has time to prepare against this push．17．寞a7（the rook has to leave the important b－file）17．．．党c8 18．鼻d4 譬c7（18．．．d5？19．cxd5 exd5 20． 思xa6＋－，and the rook is hanging $^{2}$ on c8）19．b4 d5（Black finally decides to blow up White＇s mighty pawn centre） $20 . c 5$（the knight on a5 and the pawns on b4 and c5 give White an enormous edge on the queenside． On the other hand，Black now takes over in the centre．Who comes first？）
 22．fxe4 气xe4 23．铛e1土／睍xa6， winning back the pawn，and the connected passed pawns will decide the battle） $22 . f x e 4$ 思xe4 23．${ }^{\text {思xa6 }}$ 士 Black＇s central pawns are no match for the b4－and c5－pawns；

analysis diagram
Both knights are on the edge of the board．They work very well， but White has to be alert against any surprises in the centre．18．．．
h5（18．．．${ }_{\text {M }}^{\text {\％}}$ d8．The queen simply cannot find its place．19．置a7（the rook has no squares on the b－file） 19．．． 0 xe4（Black has a lot of hidden tactical resources in petto；19．．．嚍c8
 centralized bishop on d4 fights against ．．．d6－d5，and 22． $\mathrm{D}_{\mathrm{b}} \mathrm{b} 6$ is a
寞xc1 22．鼻xb8 畕e3（it seems that the b8－bishop is trapped．．．）23．囬a3
 cannot hold his bishop on the g1－a7 diagonal anymore） $24 . .$. 畕xb2 $^{\text {xb }}$ 25．${ }^{\text {eb }} 3 \pm$ ，protecting his own bishop and attacking the opponent＇s） 19．b4 h4（the battering ram wants to break the gate） $20 . \mathrm{b} 5 \mathrm{~h} 3$（there is an exciting pawn race；who comes first？）21．gxh3 axb5 22．cxb5響d8 23．b6 $\pm$ ．White＇s advantage on the queenside outweighs Black＇s counterchances on the other flank；
 the queen will be rather unsafe on the c－file．16．${ }^{\text {effel }}$ ！（this is the right square for the rook，as there are a lot of tactical motifs when the c－file is opened）

D1）16．．．亘fd8？．By taking away the d8－square from the queen，Black creates a nice tactical possibility for his opponent．17． 0 d5！（opening the c－file with great effect！） $17 . .$. exd5 18．cxd5，and the queen cannot run away：18．．． $0^{\text {ch }} 519 . \mathrm{b} 4$ （winning back the sacrificed
断d721．0c6土，and the fantastic c6－knight leaves Black in real trouble，Pogorelov－Petukhov， Voronezh 1999；19．．． $\begin{aligned} & \text { us b6 20．bxc5 }\end{aligned}$
 White has a wonderful pawn centre with the d5－and e4－pawns and the material advantage，Gy．Horvath－ Lizak，Zalakaros 2007）20．bxc5 ©xc5 21．䙾xa6 22．䙾d4土．White has won a pawn，and the a8－bishop is completely out of play，Gulko－ Shapiro，Stratton Mountain 1999； D2） $16 \ldots$ c5？runs into the typical attacking move 17．b4．

17．．．包cd7（17．．．黒xb4 18．包b5 axb5 19．鲜xb4 bxc4 20． exc 4 ．White has won the exchange，and the weak d6－pawn is not adequate compensation．20．．． Vfd $^{\text {（20．．．量b8 }}$ 21．道a5．White is an exchange up，
so he is happy to exchange pieces， especially the queens．21．．． $\begin{aligned} & \text { 皆x } x\end{aligned}$
 up for only one pawn，and his pieces are much more active，Jo．Horvath－ Jurek，Aschach 2017）21．断 5 （the same idea as before；exchanging queens is favourable for White） 21．．．新xa5 22．©xa5 f5（Black is seeking counterplay on the kingside） 23．exf5 亘xf5 24． 0 b3＋－．Black has only one pawn for the exchange，and this is not enough．The white rooks will penetrate soon，Ibragimov－ Ermenkov，Chania 1993）

position after 17．．． Scd $^{2}$
18． C d5！（this beautiful positional piece sacrifice is a well－known motif here）18．．．exd5（18．．．贸 d 8
 bishop pair，which gives him the better chances．20．${ }^{\text {莫 }} \mathrm{f} 4$（provoking a weakening move in Black＇s pawn structure）20．．．e5（now the black pawns lose their flexibility in the centre）21．累e3 h6（against a possible宽g5）22．当d1 0 e8 23．c5，and White is winning because of the pin on the d－file，Rausis－Freckmann， Baden－Baden 1993）19．cxd5 ${ }^{4} \mathrm{~F} \mathrm{~d} 8$ 20．0c6 鲜e8 21．曽xa6土．White has
only two pawns for the piece，but Black＇s fate is sealed；
D3）16．．．』塄bd8．The rook is much worse here than on b8．17．b4 d5 （one has to reckon with this freeing move in every position in the Hedgehog）18．cxd5 鼻xb4 19．dxe6 fxe6 20． 0 d1！（this is an effective way to solve the problem of the pin．Now the black queen is counterattacked， and the a5－knight is well－protected） $20 . . . \frac{\text { üb }}{6} 8821$ ．㛧2 $2 \pm$ ．Both the a6－and e6－pawns are hanging，and there is a nasty threat of ${ }^{[ } \mathrm{c}$ cb1，pinning the b4－bishop，Middelburg－Lemmers， Groningen 1999；
D4） $16 \ldots \mathrm{~b}$ b6．The knight is misplaced here．17．b4！（Black has closed the b－file with his unfortunate knight move，so White takes the opportunity to advance his b－pawn．The b4－and c4－pawns are very flexible．Sometimes，c4－c5 or b4－b5 may be played，creating a dangerous remote passed pawn） 17．．．曽fd8 18．b5！（this time the b－pawn advances，forcing Black to open the c－file against his own queen）18．．．axb5 19．cxb5 $\pm$ ，creating a strong remote passed pawn；
 Croatia tt 2005）17．${ }^{\text {ghb }}$ h（since Black has no real threats，White uses the time to improve his position．The king leaves the dangerous g1－a7 diagonal）17．．．䌸b8 18．b4土，and White has created the best pawn formation with the b4－and c4－pawns；
D6） 16 ．．．幅d8 just loses two tempi for nothing：17．．d．h $1 \pm$ ．White uses the extra tempi to improve his
king＇s position，leaving the g1－a7 diagonal in any case；
D7） 16 ．．．h5 is one of the best plans for Black，but here it is White who comes first on the queenside： $17 . \mathrm{b} 4$ ！気5（17．．．h4？allows the typical knight sacrifice again！ 18.9 d5！ （we have already seen this well－ known blow，but it still gives us pleasure！）18．．．exd5 19．cxd5 篤d8 20． D c6！（this is the point，and now White gets back some material）
 22．${ }^{\text {ela }} 7 \pm$ ．White has only two pawns for the sacrificed piece，but the black pieces are extremely passive） 21．dxc $6 \pm$ ，and White is winning back the piece with interest）18．b5！， creating a strong passed pawn on b 5 ，and forcing Black to open the c－file．18．．．axb5 19．cxb5 $\pm$ ．White has an indisputable advantage on the queenside；
D8）16．．．乌e5 17．⿹勹厶4．

In this special variation，the knights on the edge of the board look rather effective，as they help the breakthrough b2－b4－b5 or c4－c5．
D81）17．．．鼻xe4 is an incorrect sacrifice with the idea of making
